WHICH MADE IT'S WAY TO THE FESTIVAL DE CANNES 2011 AND NFFTY 2011

We are a studio based in Barcleona. Since the first day we planned to do what we like the most: Explain histories.

So we gathered people who create what they imagine, a team capable of doing from creativity to the final development Some day, we are going to create a movie. We think a movie is the biggest art work ever. Until then we are searching for the viewers smile on projects such as tv channels identity, tv promotions, video clips, advertising and short films. With our last project, the "JokeBox" tv show, we want to bring a laughter to every corner of the universe.

With much effort and good luck we can proudly say to have created the most viewed tv promotion ever in the history of Spain. In February 2008 tv channel Cuatro commissioned us the creation of UEFA euro '08 tv bumpers. In june 17.690.000 tv viewers saw them, that meant 88,6% share. In 2004 the short film "The tilted room" was nominated for the Goya Award of the Spanish Cinema Academy. Even though we didn't win that award, we did in many other festivals around the world that opened doors and contributed to what Kotoc is nowadays.
